

# Thandi Mpofu

## Web Developer

Hi, I'm Thandi Mpofu, and I'm on a mission to become a developer. I've always been fascinated by technology, and now I'm excited to turn that interest into real projects with code. I'm learning programming languages like Javascript and Python, and I love solving problems and seeing my creations come to life. I also have a thing for CSS and making things look great. I'm here to collaborate, learn, and contribute with others in this field. Outside of coding, you can find me enjoying music, dancing, or just hanging out with friends and family.

Redux

Express

## PERSONAL PROJECTS

### Meetus ( Express / Javascript / React / Redux / Postgres )

- Meetup-Inspired Platform: Created a project taking cues from the renowned Meetup.com platform.
- Developed a dynamic online space where diverse groups and their events flourish.
- Provided users with a seamless experience to explore and engage with groups and events.
- Render: <https://meetup-project-dkgv.onrender.com/>
- Github: <https://github.com/thandi14/Meetup-project.git>

### Luvddit ( Express / Javascript / React / Redux / Postgres )

- Luvddit: A dynamic project inspired by Reddit, a widely recognized social media platform.
- Engage in diverse range of discussions just like Reddit's active communities.
- Share content and posts with the community, fostering interaction and connection.
- Interact with fellow users through comments, upvotes, and downvotes, building a sense of community.
- Render : <https://luvddit.onrender.com/>
- Github: <https://github.com/thandi14/luvddit.git>

### Edgy ( Flask / Python / Javascript / React / Redux / Postgres )

- A project clone inspired by the popular e-commerce platform Etsy.
- Collaborated with peers to bring this dynamic platform to life.
- User-Friendly Experience: Created an easy-to-use interface for both buyers and sellers.
- Render: <https://edgytwo.onrender.com/>
- Github: <https://github.com/CodeJellee/Edgy.git>
